BLAZE

A multi-zone power amplifier is a powerful tool for setting the mood throughout various areas of a retail store or supermarket. It has the capability to manage background music or announcements throughout the entire store or divide it into multiple zones, each with its own individual audio source and volume control. For instance, the food court may require a distinct music source and volume level compared to the shopping area, ensuring a more personalized atmosphere for both shoppers and diners.

On the next page there's an illustration of how our PowerZone™ Connect 1008 could serve as the audio power source in a medium-sized retail store or supermarket.
